Subject: Oppose HB 2509

Dear Committee Administrator and Senators:

I am writing you today to implore that you oppose HB 2509.

What would HB 2509 do? The bill would put Monsanto's mantra that GMO growers and farmers raising traditional and organic crops can "co-exist" into state law while ignoring the billions in economic damage that GMOs have already caused to other non-GMO farmers, but that's not the worst of it. **THIS DOES NOT REPRESENT A DEMOCRACY OF, BY AND FOR THE PEOPLE.**

1. **Forced mediation.** HB 2509 would effectively force farmers whose crops were contaminated by GMOs into a vague "mediation process" orchestrated by the Oregon Dept. of Agriculture (ODA) before a farmer could go to court to sue to try to stop GMO contamination. Farmers can already use mediation if it make sense, but they should not be forced into a biased "mediation" process controlled by staunch GMO supporters at the ODA. **THIS DOES NOT REPRESENT A DEMOCRACY OF, BY AND FOR THE PEOPLE.**

2. **Liability for farmers contaminated by GMOs.** If a farmer refused to mediate, HB 2509 says they could be liable for hundreds of thousands of dollars in a GMO-grower's attorney's fees in a related court case. AND if Monsanto or their ilk joined the case, the farmer could even be liable for their attorney fees. **THIS DOES NOT REPRESENT A DEMOCRACY OF, BY AND FOR THE PEOPLE.**

3. **Pro-GMO mediators.** HB 2509's mediation process would be orchestrated by the State agency that has done more to defend GMOs than any other: the Oregon Dept. of Agriculture (ODA). ODA could then create a costly and time consuming mediation process that would make it harder for farmers to protect themselves against GMO contamination. **THIS DOES NOT REPRESENT A DEMOCRACY OF, BY AND FOR THE PEOPLE.**

4. **Funding for OSU propaganda.** The bill would also direct propaganda funding to OSU for "educational materials and information regarding the coexistent use of agricultural lands." The bill would put OSU, which has a long history of promoting GMOs, in the position of using Monsanto's talking points that GMOs can "co-exist" with organic and other non-GMO crops despite the dramatic contamination events and billions in damage that GMOs continue to cause to non-GMO crops. **THIS DOES NOT REPRESENT A DEMOCRACY OF, BY AND FOR THE PEOPLE.**

Please don't buy the co-existence lie! if you do, you will be putting Oregon's multi-billion dollar seed industry out of business!, and thereby affecting the lives of more than just farmers, but the economic health and vitality of millions of Oregon citizens.

Thank you.
