

Please ensure that the House and Senate vote on HB 3470 bill this session. House E & E Committee HB 3470 provides state of Oregon's support for responsible Greenhouse Gas Emissions reductions. We believe this bill deserves a vote and consideration by the Oregon Legislature. It would responsibly set required reductions in Green House Gas Emissions. The bill is Oregon's opportunity to take effective leadership in Climate Stability and Climate Change Justice for all Oregonians.

Respectfully

JoAnn DeSpain
