

Gentleman

I would like to ask you to vote against these bills and do what ever necessary with in your power to make sure these bills do not pass. These bills would over ride any right for the counties to decide what type of farming is best for their counties,plus have Oregon become the prime litigation capital for US agriculture. It has been proven that GMO crops can not co-excist with Organic Farming. Please remember the Wheat issue when China sent back Oregon Farmers Wheat because it had been contaminated with GMO seed last year!

The counties in California and other states that have gone non GMO have increased their sales of Agriculture products and brought in more revenue for the counties. The only thing that these two bills would bring is more costs to the farmers and counties that would be farming non GMO crops and more incorrect information regarding GMO crops vs organic crops from USO which has a history of incorrect information concerning this issue.

Thank You

Bob Lathan Jr.
