

Hello,

As a voter in Oregon I request that the Senators on this committee oppose HB 3212. This misguided bill would undermine the ability of every county and city to adopt any law, like Jackson County's ban on GMOs, that protects small family farmers from damaging agricultural practices. Property is worth so much more than a corporate claim to "land-use," and ensuring the food security of future generations is more important than keeping money in Monsanto's pockets.

As a registered voter in Oregon I urge you protect individual counties' rights to determine their own land regulations, and help protect the future of small family farms.

Thank you
Niema Wilson
