

Senators,

I urge your support for HB 1388. Predator control is an essential part of the economic viability for so many in Douglas County. The County can no longer afford to support this effort financially in the county and a group of local land owners have stepped up and taken it upon themselves to create the ability to fund this program themselves. How often does that happen? It is a well thought out and reasonable solution and I urge you to support their efforts!

Thank you!

Chris Boice
