BACKGROUND:

In 2013, the Legislative Assembly passed House Bill 2348 which created the Task Force on the Future of Public Health Services. The bill directed the Task Force to: create a public health system for the future; explore the creation of regional structures to provide public health services that are consistent with the distribution of population and established patterns of delivery of health care services; enhance efficiency and effectiveness in the provision of public health services; allow for appropriate partnerships with regional health care services providers and community organizations; consider cultural and historical appropriateness; and are supported by best practices.

The Task Force released the final report in September 2014.
