

To the Joint Committee on Measure 91,

With all respect I think you are over reaching these limitations of a 1 mile radius in our small communities. I know that within that same 1 mile there are many stores that sell alcohol and many bars and restaurants that also distribute alcoholic drinks at these same locations. I personally believe that if a community allows these sales within that same distance, should be prohibited from implementing discrimination against the sale of a far less harmful substance.

Respectfully Cynthia M. George  
Please submit as part of the record.
