

Dear Members of the House Rules Committee,

Thank you for holding a work session on HB 3470. This legislation will address climate change in a comprehensive, meaningful way -- and we cannot wait for it. Hundreds of fires are burning in Alaska, Colorado is underwater, and here in Oregon we are experiencing severe drought. The threat of climate change feels more real every day, and it is up to our elected officials to act immediately to prevent future catastrophe.

Please move HB 3470 forward today.

Thank you,
Page Atcheson
