

Dear The Oregon State House, The Oregon State Senate, and Governor Kate Brown,

We are pleased to present you with this petition affirming this statement:

**"HB 3470 would cap greenhouse gas emissions in Oregon and eventually reduce atmospheric discharges to 75% of 1990 levels. It would cover all major industries and all important greenhouse gases, including CO2 and methane. A portion of the funds generated by this measure would be used to mitigate the economic effects of the program on low-income communities.
"**

Attached is a list of individuals who have added their names to this petition, as well as additional comments written by the petition signers themselves.

Sincerely,
Diarmuid McGuire

Debra Higbee-Sudyka
Corvallis, OR 97333
Apr 29, 2015

it's clear that we need to move on to other forms of energy and reexamine our societal/lifestyle dependence on wanton energy consumption. It's gonna have to happen, sooner or later. Might as well look smarter about the strategy and start sooner before this concern deepens any further.

It is imperative that action is taken by our elected governing bodies right away since we are already in the midst of climate change in the form of missing mountain snow packs, more extreme storms, drought and catastrophic forest fires. If current trends continue, we expect even more terrible impacts. For our own protection now and into the future, we must take action immediately. We cannot afford to wait for another election cycle to deal with these critical issues.
