

I urge you to support HB3470 which is designed to create a comprehensive policy which will:

- Achieve Oregon's emission objectives.
- Be politically feasible.
- Navigate Oregon constitutional provisions about fuel taxation.
- Reflect the preference of Oregon's citizens.
- Help the economy.
- Be fair to at-risk populations.
- Contribute to a larger regional or national greenhouse gas policy.
- Remain flexible within best science, technology and changing circumstances.

We know this Bill will work, it has a positive track record.

Sincerely,

Louise Shawkat
