

SB 202

Relating to independent scientific review

SB 202 establishes a Task Force on Independent Scientific Review for Natural Resources at Oregon State University and abolishes the Independent Multidisciplinary Science Team. The Task Force is to evaluate and assess the need for independent scientific review in Oregon and make appropriate recommendations in a report to the Legislative Assembly.

The Joint Committee on Ways and Means previously approved this bill, and it has passed the Senate.

The -B7 amendment resolves conflicts with SB 80 which abolishes the Oregon University System and this amendment resolves references to the Oregon University System.

I recommend SB 202 be amended by the -B7 conflict amendment and be reported out do pass, as amended.
