Revenue Impact (in \$Millions):

	Fiscal Year		Biennium		
	2015-16	2016-17	2015-17	2017-19	2019-21
General Fund	\$0	-\$6.2	-\$6.2	-\$13.6	-\$14.8

Impact Explanation: The preliminary revenue impact provided here is based on the historical use of the tax credit as reported on tax returns. The use of this tax credit between 2005 and 2012 grew at an average rate of 4.8 percent, increasing from roughly 28,800 to 40,100 claimants. During that same time period, the total amount of tax credits used to reduce tax liability each year grew from \$3.2 million to \$5.0 million. The estimates provided here are based on the assumption that these growth rates will continue through tax year 2021. Further analysis will be done when the bill is in the Joint Committee on Tax Credits.
