

Rebecca Roth

SB 1574

Oregon built dams which provide clean energy in abundance. Making our citizens pay exorbitant amounts for energy is criminal. We should be enjoying the energy resource which has already been put into place, and continue to provide more energy for new industry.

The climate scam which identifies CO2 as a pollutant is fiction, and an elaborate hoax conducted by the Democrat Party in collusion with the UN, to subject American people to denial of resources.

The UN take-over of Oregon through Democrats enacting legislation that denies the citizens of Oregon Life, Liberty and the pursuit of happiness, is treasonous.

The earth is intended to be used by people and we are to tend and care for it. Locking it up because of fictitious identification of CO2 as a pollutant will cause the citizens of Oregon to lose our independence and make us subject to UN bureaucrats who hate our sovereignty.

When I told a leader in the Democrat Party that Belgium is killing children through age 4, he replied, "but only the handicapped."

This callous reply let me know that if there are people who lose their lives due to Democrat policy, they will not care.
