

*Dear Kristi,*

*Stop The Vendetta Against Gun Owners.*

The February “short session,” which was sold to Oregonians as a way to deal with nothing but budget issues, is being used to ram through more of Michael Bloomberg’s wish list.

Every effort will be made by the anti-gun majority to rush through more dangerous restrictions on gun rights with as little public input as possible.

*It’s clear that the majority in Salem is determined to continue their vendetta against Oregon gun owners. I certainly hope you will not be assisting them. Senate Bill 1551 has no purpose except as a tool of harassment and vindictiveness. It offers no intervention or services for people who are in a genuine mental health crisis and does nothing to stop truly dangerous people from hurting themselves or others.*

*It does not take dangerous people off the street or deny them access to any of countless ways to kill or injure. It is purely a cynical attack on the rights of Oregonians through secret tribunals with no due process.*

*HB 4147 strips Oregonians of the only safeguard they have against the faulty OSP database failures. Under this bill the State Police will be allowed to deny a lawful transfer literally forever.*

*Michael Bloomberg’s millions have done significant damage to Oregon. Most counties opposed the last bill he paid to have passed here. (SB 941) I strongly urge you to avoid tearing Oregon apart with more vendetta driven legislation.*

*respectfully submitted,*

*wally west*
