

Dear Representatives,

I urge you to vote "No" on this bill.

1. This bill will pass through cost increases to the consumer. We cannot afford more cost increases.
2. Boardman is already scheduled to close.
3. It has been proven that even if Oregon had no people there would be no measurable decrease in greenhouse gases.
4. Europe has stopped promoting wind generation because the process and cost to build and maintain the wind generators creates more greenhouse gas than they could ever eliminate.
5. Windmills kill birds!

VOTE NO!

Sincerely,
Carla Pletka
Milwaukie
