

Serious Enterprises Testimony on SB 1511-10  
Provided by Lindsey Rinehart

Thank you for providing this amendment. While we recognize that the committee is trying to give the additional time needed for growers to comply with the plant count reduction and that is appreciated, we feel that December 31<sup>st</sup>, 2016 would adequately suit this purpose as opposed to the May 1<sup>st</sup>, 2016 extension. We would encourage the committee to consider the December 31<sup>st</sup>, 2016 date that most growers say would be adequate time to comply, as well as to allow Micro-Canopies to be in place for the patients that are suffering from plant cuts to have an option to utilize.
