

Dear Representatives,

The livelihood of citizen's in our state is at odds with trying to reduce greenhouse gases. We cannot afford more regulation on top of tax increases on top of regulations on top of utility increases and everything else!

Therefore it is imperative that rules for assessment be put in place to determine the cost/ benefit outcomes of any suggested standards to reduce CO2 emissions.

With China spewing huge amounts of pollution into the atmosphere and the US agreeing that their peak emissions will hit in 2030 (US/China agreement Nov. 11 2014) this will only give them the trade advantage even longer.

This effort is a fools errand for our state!

Please vote yes on this bill so that we can assess the steps before they are taken!

Thank You,
Carla Pletka
