

Hello. My name is Tony Diethelm.

I'm a technician at Intel, and a soon to be Father.

How hard is it for a normal guy to talk to their federal representative? How hard is it for a donor who writes \$5000 checks to talk to my federal representative?

We know who will get a meeting, and that is skewing our democracy from its foundational roots, and affecting every issue we are facing. Every issue I care about, the fix is gated by my ability to talk to the person who is supposed to represent me in our government and be heard. The cost of winning even state elections is rising. How long will my voice be heard at the state level?

I'm about to become a Dad. My wife and I are due July 5th. I'd like my child to grow up in a system that represents them, not the few that can afford to have their voices heard.

Please support HJM201. Please represent me.
