The Association of Oregon Counties Supports HB 4101

The Association of Oregon Counties' Energy, Environment and Land Use Steering Committee (EELU) voted to support HB 4101. County Commissioners and Judges felt that an effort to assess the net impact of the State's efforts to reduce greenhouse gas is worthy of pursuit. The Steering Committee felt that having a report from the Environmental Quality Commission would contribute to making better decisions in future policy matters concerning greenhouse gas reductions.

The Steering Committee's recommendation was approved by AOC's Legislative Committee. If you have any questions regarding AOC's position, please contact Mark Nystrom at mnystrom@oregoncounties.org.
