

Dear Representative Clem,

As a small business owner, I understand the economics of raising the minimum wage. It's very simple to understand that having to pay someone more than what their skills are worth -- to our business and ultimately to our customers -- results in that person becoming unemployed.

We as a society need to focus our efforts on teaching skills to improve an individual's worth to society, rather than the band-aid approach referred to as minimum wage.

I am opposed to SB 1532.
