Dear "Senate":

Please pass HB4040 and delist the gray wolf in Oregon. I ride my horse out in the wilderness and I take my dog along, plus I have rancher friends who are having a hard time dealing with wolves chasing and killing their cattle, thereby ruining their chance to make a living, and I cannot understand how the so-called environmentalists can know exactly how many wolves are "necessary" to be out in the forest.....they have proven to me that they are NOT scientists (i.e.raging wildfires due to THEIR policies being enacted years ago!) and I wonder how they even can have legal standing in the legal arena, because I thought you had to prove that YOU had been harmed, and they certainly haven't been harmed like the ranchers and the loggers have!!!!

Thank you.
