

Dear Ms. Seiler:

I would like you to suppress S. 1573, as a major assault on our rights to annex land into our UGB's based on what our communities can afford. Real estate developers shouldn't have the power to simply force gargantuan subdivisions on us if we can't provide the infrastructure. This bill is typical of what Democrats do whenever they think no one is looking, and putting an automatic emergency clause on nearly every bill indicates how much they can't stand the idea of the people being the final word,

I strongly suggest you drop this bill. Even in Oregon, the citizens have tired of being dominated by arrogant, top down, control fanatics, as our rejection of driver cards for illegal aliens should have shown. This session was supposed to have been for tuning the budget, not muting the voice of the people.

Sincerely,
Lyneil Vandermolten
