

MARK COLLIER, JOSEPHINE

my name is mark, i'm an oregonian, patient, and a vet.

because of where cannabis finds itself on the federal Substance Control Act, if a vet was to admit she or he was seeking pain or mental relief thru cannabis, they would lose all rights to any and every other medications and services they have been prescribed. so it takes some element of exposure to come up here and say, "i'm a patient."

Soo. a little history is in order.... did you know, that since WWII ended, 8 / 10 military engagements that have ended in even one death, have been initiated by? the elected officials of the US. People, such as yourselves, who have been elected - to whichever office they find themselves, have issued the Lawful Orders, to send bastards like me, to kill others in your "interests." and did you know, in that same time period that of those killed, again in your "interests" 9 / 10, were.... civilians?

that's certainly not how any veteran i know, intended to serve his country. the indiscriminate death of non-combatants, whether abroad, or at home, - (read Harney County) leaves a poor taste in the mouths of most veterans. and for many, a diagnosis of Stress – Post Trauma.

(again, today, as i speak not as one, but for all veterans, The only veterans on whose behalf I CAN'T speak, will be the 21 or so, who will have killed themselves, by the stroke of midnight, tonight.)

scroll forward to today....

... where for the last 19 years, it's been legal, in this state, to prescribe, grow, and intake, cannabis - What has changed? Your perceptions? So now you say, that you can move the goal posts, and gin up all manner of new rules and regulations that will serve only to separate patients, like me, from **experts** who provide the medicine, but lack the lobbyist platform to influence legislators, such as yourselves? Maybe? Nothing, NOTHING, in the Cole memorandum dictates the level of tyranny of which you are proposing today... "Structurally designed fencing."

Seriously? Water Rights from an agricultural area that has more runoff than all of California combined? You should be KILLING IT, with the grow potential of this state, but instead you are proposing impediments to the production of this medicine just because you don't understand it!

You're uncomfortable with it, so you're gonna kill it! The dictate for

“security cameras,” and seed to sale is not designed to protect anyone, but to draw everyone and into a regulated, READ taxable moment. And by doing so, you leave behind the very therapeutic value of this plant.

And thereby the patients who <sup>NEED IT</sup> benefit the most. <sup>EVER'S, LIKE MYSELF</sup>

Now I know, that I stand little chance, or opportunity, to change your mind, with my little 180 seconds of fame. No, I don't for one second to expect to change your collective mindset. But I can tell you, that it's not your place, to make new rules, that ~~have been rightly ascribed the title of~~ <sup>ARE</sup> “Arbitrary and Capricious” and will result in the “Illegal Taking of Land”... thereby changing the game as it's been played for the last two decades, for what EVER reason you deem. And we know it's not about the smell. Nor is it about water. More water runs Rogue thru this land than is needed to feed all the grow sites today and in the future. Again, you should be KILLING it, instead, you're Killing it... You are imposing your morality, on my mental state. Only because it doesn't have the backing of “GlaxoSmithKline, Phizer, Merck, BMS. ~~And, again,~~ <sup>We</sup> we're not gonna stand for that.

\*\* CONTINUED FROM PREVIOUS PAGE \*\*

PTSD , I would support OMP for veteran based on the symptom relief he reports. At this point due to federal law I cannot sign for this card.

Medication and problem list reviewed and updated where applicable. A reconciled medication list was given to veteran at discharge.
