While districts with fewer students often have “volatile” data, note that the districts with the highest percentages of homeless student in the state are mainly rural and some distance from the I-5 corridor. Their homeless counts are attributed to unemployment, lack of family-wage jobs, and lack of affordable housing in their regions.

Shared Vision and Values

The Vision

No one should be homeless. Everyone needs a safe, stable place to call home.

Guiding Values

- Prioritize the most vulnerable
- Promote racial and ethnic justice
- Hold the programs we fund accountable and use data to make decisions
- Engage and involve the community, especially those with lived experience
- Strengthen system capacity and increase leveraging opportunities

Shared Plan

Key Focus Areas

- Housing
- Income and benefits
- Health
- Survival and emergency services
- Access to services
- Systems coordination

Priority Populations

- Families with children
- Unaccompanied youth
- Adults with disabilities
- Women
- Veterans

The Challenge: Rents Outpacing Incomes

While districts with fewer students often have “volatile” data, note that the districts with the highest percentages of homeless student in the state are mainly rural and some distance from the I-5 corridor. Their homeless counts are attributed to unemployment, lack of family-wage jobs, and lack of affordable housing in their regions.

*Oregon Dept. of Education – Oregon Statewide Report Card 2015
- 2016*

“The increasing proportion of poor families paying at least half of their income to housing is the result of a combination of three factors: rents and utility costs have soared, incomes of the poor have fallen or flat-lined, and federal assistance has failed to bridge the gap.”

Matthew Desmond, Fast Focus, 22-2015

“Mostly the news is bleak, particularly for rural Oregon children and for children of color. Stagnant wages and rising rents and other costs mean their families are struggling to make ends meet...”

Rising rents, slow-to-recover earnings trap many Oregon children in tough circumstances, Oregonian, Nov. 16, 2016

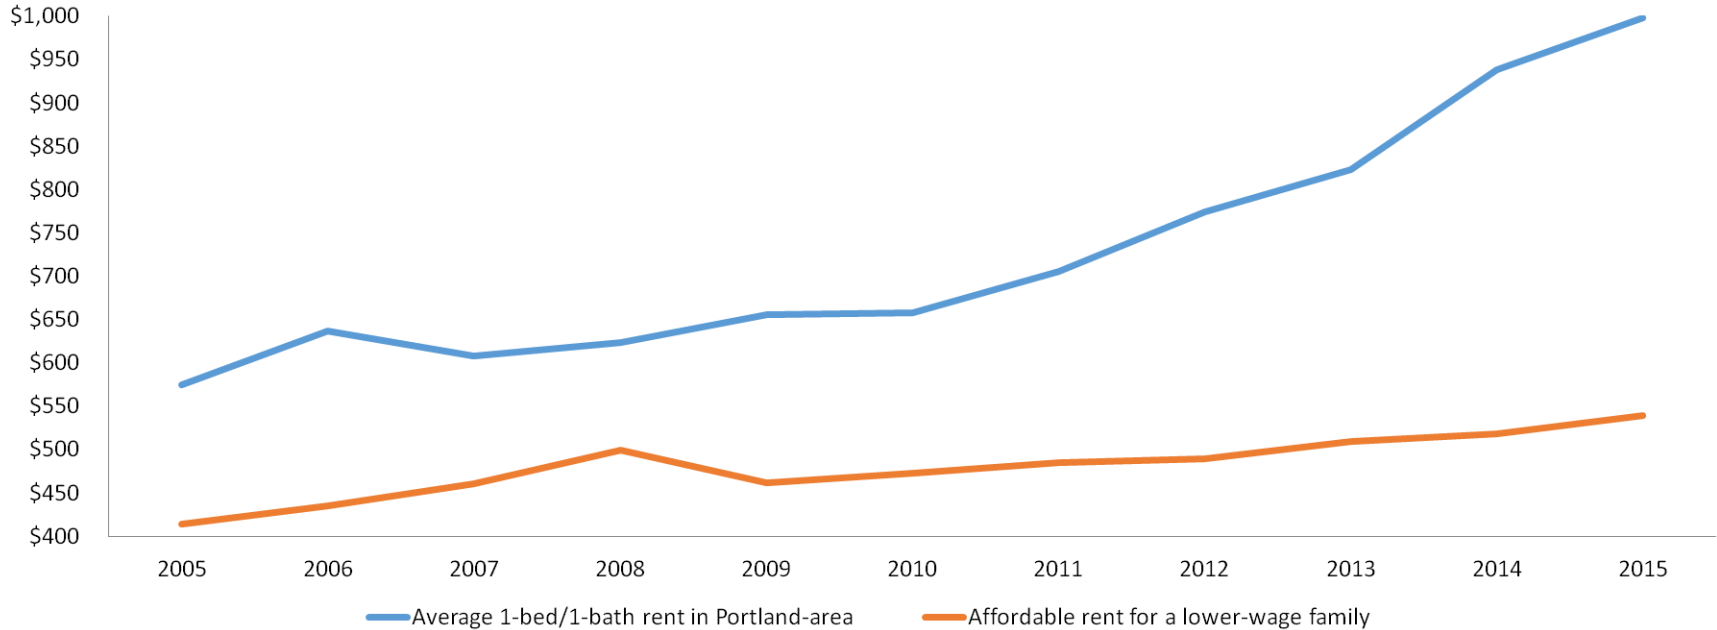

“The average Latino household in Portland saw the last neighborhood with rental affordability disappear. They now join the average Black, Native American, and single-mother households, for whom there are no neighborhoods in the city where they can afford to rent. “
