

SB 274 -2 STAFF MEASURE SUMMARY

Senate Committee On Education

Prepared By: Lisa Gezelter, LPRO Analyst

Meeting Dates: 2/28

WHAT THE MEASURE DOES:

Requires post-secondary educational institutions that provide housing to provide information on vaccine-preventable diseases known to occur in individuals between the ages of 16 and 21 years old. Establishes program requirements. Makes technical changes to state law governing immunization requirements for college students.

REVENUE: May have revenue impact, but no statement yet issued

FISCAL: May have fiscal impact, but no statement yet issued

ISSUES DISCUSSED:

EFFECT OF AMENDMENT:

-2 Adds definition of post-secondary institution of higher education. Eliminates references to specific diseases. Eliminates the requirement that students acknowledge receipt of information. Adds requirement that institutions inform students about vaccines categorized as A or B either by the federal Advisory Committee on Immunization Practices or the Centers for Disease Control and Prevention. Specifies that bill does not create a private right of action against a post-secondary educational institution.

BACKGROUND:

Currently, state law allows the Oregon Health Authority (OHA) to require that post-secondary educational institutions require students to be vaccinated before the student's second quarter or semester of enrollment. Community colleges and career schools are exempt from these provisions. Students attending school on a nonimmigrant visa must be vaccinated before attending classes. Senate Bill 274 adds provisions requiring that institutions inform students about available vaccines and the diseases they are designed to prevent.

According to the Centers for Disease Control's Advisory Committee on Immunization Practices, Category A vaccines are recommended for all persons in an age- or risk-factor group, while Category B vaccines are recommended for individuals by their clinicians.
