Greetings Senator Dembrow,

I would urge you to vote in favor of of SB 557 which I believe is coming up for vote March 1st. This bill seems to strike the most sensible balance between protecting our marine resources while avoiding disrupting stable, affordable energy supplies.

As a lifetime commercial fisherman of near 60 years I am very concerned with the continuing deterioration of our oceans due to ongoing acidification and exploding bloom of Phytoplankton. Thank you very much for your attention.
