

Imagine for a moment you are the one with a bad tenant or adverse circumstances come your way. For many people like myself there is very little profit in the couple of rentals we have. We were hoping to some day supplement our S.S. income. We can not make it if we loss hundreds or thousands of dollars due to legislation like this! Every year it becomes more difficult to be a landlord, or at least it is for someone like us, that isn't doing it for their lively hood. Please please please reconsider on HR2004 and any more oppressive bills like this. In some areas rental are in short supply, if you force me, and people like me out you will only increase the hardship for all, and hurting our great state.

Thanks for your consideration,
Jerry Griggs
