Subject: Opposition to HB 2711 3/8/17 hearing

The following is my testimony for 3/8/17 hearing in opposition to HB 2711.

Chair Helm and Members:

I am opposed to any moratorium on scientific exploration of any underground resources in Oregon. In the event of a national crisis or a local crisis we may need these resources, at least to know where they are and we should be able to produce them if necessary. The state can impose safety conditions for the research and production, if necessary. It is unwise to put moratoriums on natural resources of Oregon which have the potential for energy production.

Please vote no on HB 2711.
