

Hi,

I am an Oregon tenant and you need to support HB 2004. The affordable housing market here has been allowed to disappear while our houseless population is allowed to live in barbaric, pre-medieval conditions (which made the news this week!)

This is a public health disaster in the making, as well as a crash just waiting to happen. It is both shortsighted and immoral to ignore the welfare of your constituents in favour of profits.

I lived in an apartment complex with a toxic mold problem; after reporting it, the three tenants who reported it had to find new places to live, while the landlord upped the rent another four hundred dollars. Apparently living in non-toxic housing is a luxury, and not for the aspiring student, young couple just starting out, or single parent household!

Thank you for your support of HB 2004.

Matilda
