

I am writing today to ask you please support HB 2004. I am a mother of three children who has been displaced and essentially homeless and living with friends while my kids stay in Tigard with their father now. Rents have been out of control and are continuing to be out of control. I am also a voter in line with many many other voters in the Portland area who are outraged with the greed put above our right to basic shelter. This must stop now!!!

If you will not listen to renters we will be forced to put those who have our best interest in office. thank you in advance for understanding our plight and having the courage to do something about it.
