

I support HB2004. I work in the housing management industry and the current laws have led to widespread disruption and difficulty for thousands of families due to no fault of their own. HB2004 is a good compromise to provide some potential protection for tenants, while still being fair to owners, allowing them to have reasonable control over their property. Property ownership comes with both rights and responsibilities... we need to balance these out and HB2004 is a more balanced solution.

Thank you.
