

Please support HB 2004!

I was born in Portland and am now a working professional. My dreams of owning a home are gone because of rising home prices. I will always have to rent. I deserve to be able to live in my city. I deserve to have protections from landlords! Housing is not a commodity to be served out by the wealthy - it is a human right. Renters protection support people having stable homes! I rent and that does not mean I do not get to have any stability in my housing.

You cannot vote against tenants and think you are legislator supporting the 'peoples will'. Support HB 2004 and stand up for tenants.

Thank you,

Hannah Rosenau
