Subject: Support for SB 860

I am a Licensed Professional Counselor, and this morning in staffing several therapist said, "I would recommend..." different types of services for their clients, but they have known several private insurance companies to deny these types of services in the recent past. It is sad that the privately insured of this state can not access the full range of behavioral health services those on OHP have. Why put all these services into place within the state, if the services are not going be available to all? Therefore, I support SB 860 to help better assure services to all Oregonians needing behavioral health care.
