Chair Dembrow and members of the committee,
I'm Clair Klock from Corbett, OR. Please support SB 866. It just makes sense. I was recently in Mississippi. Their idea of stormwater practices is roof water from gutters across the lawn into a grassed waterway into a concrete ditch into a incised creek into the Mississippi River for the people of Vicksburg, Baton Rouge and New Orleans to deal with. In the "olden" when I was a kid the landowner just piped the water and dump water onto their neighbor whether it hurt the neighbor or not. That is not acceptable any more.
Thank you.
