

Dear Administrator,

Childhood cancer rates have risen 50% since the 1970's. One of every two people will get cancer. How long, how long does this human race have to tarry along in the face of this threat with foolish human hubris? How long do we replace God with Business as our new deity?

Please support 2469, and give the people what they deserve, want, and have every right to have, except for the ignorance and greed of human business people and stupid, naïve politicians *who give business what they want - damned the wisdom of the people.*

Please pass on this message to all House Members.
