

My name is Richelle Corbo and I live in Salem Oregon, Senate district 11 and House district 22.

I would like to ask the House Rules committee to vote in support of HB 2927.

If a proposal were to come before the American people to weight a person's vote based on their education level I think it would be soundly, and rightfully, rejected. Why then do we accept a weighting based on geography?

The electoral college means that all votes are equal, but some votes are more equal than others.

Thank you for your time and your service to Oregon.

Richelle Corbo
