

Please support House Bill 2927, which would bring Oregon into the National Popular Vote Interstate Compact. This would give an equal vote to Oregonians and allow us to have a greater impact on determining the issues addressed in the campaigns of Presidential candidates rather than having a dozen states get all of the attention.

Whatever led the founding fathers to set up the Electoral College instead of a popular vote for President in the first place has been superseded by modern day circumstances. We have seen numerous recent elections in which the majority of voters have been denied the opportunity to have their Presidential choice assume the office of President. It is time to end this and let every citizen's vote count equally.

I urge you to support HB 2927.
