

House Rules Committee Chair Jennifer Williamson and committee members:

It is our strong belief that our founders instituted a brilliant system, the Electoral College, to ensure that all states have a chance to be represented in our presidential elections. Our country is not a direct democracy as you all know. Our form of government is a Representative Republic and thus the absolute need for the Electoral College. When 51% of the population is able to deny the individual rights of the other 49% then we have mob rule. Please carefully consider the impact of this legislation.

Sincerely,

Scott and Diane Schendel
