

Please do not consider getting rid of the electoral college. It is important that EVERYONE is represented and if we do not have the electoral college, there is a good chance that the metropolitan, university, and high population areas will dominate unfairly in elections. All physical areas of our country need to be represented - not just those areas in large population centers. I believe in the purpose of the electoral college. Just because we had one election where people are conflicted by the fact that the rural areas of the country spoke up, do not unfairly silence them. Thank you NO on HB 2927.
