

Dear Chair Clem,

I oppose HB 2469;

* The state of Oregon is already in a budget shortfall how will it pay for more government oversight.

* Farmers are already restricted to where they can plant this bill will make for further restrictions on farmers of what they plant as well as where.

* There is already governmental regulations regarding GMO seeds.

This bill is meant to protect organic farmers not the public at the cost of the tax payers and non-organic farmers.

Sincerely,

Elizabeth Wright
