

As a concerned Oregonian and consumer of a lot of local, organic produce, I am urging you to support HB 2649. Our food supply is too important to ignore concerns about GE crops.

This bill, as you know, will restore the ability of local farmers to address their diverse agricultural needs at that community level and allow communities to create measures such as GE-free zones to protect family farmers and specialty non-GMO crops.

Take a positive step and help our agriculture thrive.

Thank you for your consideration.

Sincerely,

Maurine Canarsky
