

Please Support HB 2469, we need to protect our crops.

I was very upset over how we the people LOST our rights for getting GMO labeling on all of our food. What GMO's are doing to our gut flora has me watching what I purchase to eat. I have called several of the growers and manufacturer's of those products that I eat, and have them tell me they do NOT use GMO's, but because the fields next to them are growing GMO, they can not get labeled as GMO free! Help me FIGHT Monsanto and their lies. They are destroying the earth's environment!

Thank you.
