

Over the past decade, repeated episodes of contamination by genetically engineered plants have cost U.S. farmers billions of dollars. Oregon farmers grow many high-value or specialty crops that are at significant risk of contamination by GMO crops. Creeping Bentgrass, a GMO grass, continues to spread in Malheur and Jefferson counties.

GMO crop contamination usually pits farmer against farmer. HB 2739 would hold patent holders, instead of farmers, responsible for contamination events.

As a staunch GMO-FREE supporter and supporter of Organic foods and agriculture I highly value Clean Food. GMO food is Not clean food!

Please support this bill!
