

Dear House Committee Members,

In 2013, the Oregon legislature took away the right of local government to regulate agriculture. Since then the legislature has failed to provide any meaningful statewide regulations to protect family farmers from the risks of genetically modified (GMO) crops.

[HB 2469](#) would restore the ability of local farmers to address their diverse agricultural needs at a community level by allowing communities to create measures such as GE-free zones to protect family farmers and specialty non-GMO crops.

Please distribute my comment to committee members.

Thank You!
