

I am a health aware consumer and request that you support my right to know what is in the foods I purchase, to empower farmers to meet the demands of their markets, and especially to protect food viability by ensuring that seed diversity maintains a healthy gene pool. I urge you to support these two House Bills;

HB 2469 would restore the right of local farmers and communities to, among other things, protect their specialty crops and farmland by establishing GMO-free zones.

HB 2739 would protect farmers and communities from contamination by genetically engineered crops by holding patent holders responsible.

Sincerely,

Kenneth Jackson
