

Please support HB 2469. We cannot allow GMOs and companies like Monsanto to destroy agriculture in Oregon. US agriculture is being destroyed not only by GMO crops but by the millions of pounds of pesticides being poured onto our lands. Please stop this in Oregon. I eat--and grow--only organics and have managed to stay healthy. But people in the US and in Oregon are being poisoned and their health destroyed by the GMO companies. Be like Mexico which has said no to Monsanto.
