**Subject:** HB 2669 Community Toxics Reporting Act

Dear Chair Helm and Members of the House Energy and Environment Committee,

I am writing to urge passage of the Community Toxics Reporting Act HB 2669.

This Bill is of particular importance at this time when the Federal Administration is rolling back environmental protections. Communities have a right and a duty to protect our environment and providing the needed information to make informed decisions is a key factor in keeping our air and water safe and healthy.

This bill allows us to do so in ways not fully covered in other regulations.

Once again, I urge passage of HB 2669.

Nancy Wallace, RN
