

March 15, 2017

Chair Greenlick, Co-Chairs and Members of the Committee:

On behalf of *Adelante Mujeres*, I respectfully request your support for the Reproductive Health Equity Act (HB 3391).

Now in our 15<sup>th</sup> year, *Adelante Mujeres* continues to offer empowerment opportunities to low-income Latina women and their whole families through holistic education and enterprise programs in Washington County. Our participants and students have achieved success in a variety of ways, interrupting the history of poverty that led our immigrant community to brave life in the United States in the first place. Inspired by their fearlessness, *Adelante Mujeres* models hope and justice in everything we do, acting courageously. Therefore, we strongly endorse the Reproductive Health Equity Act.

With the imminent repeal of the Affordable Care Act, hundreds of thousands of Oregonians could lose no-cost-share coverage for essential reproductive health services. When the cost of care must first come out of a high deductible, these services can be unaffordable and inaccessible for many. This is particularly problematic for women seeking abortion — a time-sensitive and critical service that 1 in 3 women access by the time they are 45.

Furthermore, 48,000 women of reproductive age in Oregon are categorically excluded from Medicaid due to their citizenship status and are prohibited from purchasing insurance with their own money on the Exchange. These women have coverage that ends immediately after labor and delivery, leaving them without care during the postpartum period, a pivotal time for both mom and baby.

Finally, transgender and gender-nonconforming Oregonians need access to services often categorized as “women’s health care,” including gender-specific cancer screenings. However, procedural barriers hinder access to this necessary and lifesaving care.

The Reproductive Health Equity Act establishes comprehensive coverage for the full spectrum of reproductive health services — including family planning, abortion and postpartum care — for all Oregonians, regardless of income, citizenship status, gender identity or type of insurance. Restrictions on reproductive health care can have profoundly harmful effects on public health, particularly for those who already face significant barriers to receiving high-quality care. This legislation ensures that all Oregonians are able to decide if and when they have children based on what’s best for them and their family’s circumstances.

*Adelante Mujeres* supports HB 3391 because we know that Oregonians need access to full reproductive health coverage for all families to thrive, for a stronger economy and for a healthier state. We hope that you will join us in support of the Reproductive Health Equity Act.

Sincerely,

Bridget Cooke  
Executive Director
