Subject: No on HB 2705, 2706 & 2707

Dear Representatives

This is Crazy and will not do one thing to preserve the water balance in any basin. The State tried to do this a few years back and we managed to fend off this nonsense but they are back as always. And as always it's not about water it's about control. First they are hitting us with ground water control without any science behind it and now they want to cost us for surface water control without any science behind it. Next thing they will propose a huge taxpayer funded study to tell us how we can use our rights to use water!!!

What don't they understand about rights and adjudicated rights???

STOP HB - 2705, 2706 & 2707 ALREADY!!

TIM SMITH
