Subject: Please pass HB 2669 and SB 995

Dear Chair Helm and Members of the House Energy and Environment Committee,

There's a major hole in our ability to monitor and protect our basic resources, i.e. air, water and soil, from pollution. We need to close this hole and we need to do it NOW. Therefore, I support the passage of HB 2669 because it is the most comprehensive and accurate toxics reporting that the State of Oregon would have. A Toxics Reporting and Community Right-to- Know Program adds the greatest value added to the community because it is detailed and very specific to the community needing to access the toxics data. No other program helps communities and local governments know what is being emitted to all of the environmental media: air, water, land and hazardous waste dumps.

This is an environmental justice issue: All communities have the right to know what is in the air they breathe and the water they drink.

Please put the benefits to all over the inconvenience of a few and pass these bills.

Thank you.
